**PUBLIC NOTICE: Return to Operations – Deer Lake Power**

Deer Lake Power advises residents of Deer Lake and nearby communities that the hydroelectric power plant **will begin to resume operations starting Sunday, September 7**, and continuing through Tuesday, September 9.

During this period, power generation will increase, resulting in higher water flows. This will raise water levels in both Deer Lake and the Humber River, which are currently at low levels.

**What to Expect:**

- Water levels will begin to rise during the operational period and may continue to fluctuate in the following days.
- Areas that are currently accessible by land may become submerged or cut off.

**Safety Reminder:**

Please use caution near shorelines and waterways. Be aware of potential hazards, including:

- Slippery or unstable banks
- Strong currents
- Floating debris

**Please remain vigilant** and monitor for changing conditions.
